---

## EXPERIENCE

**AgileVentures**, London, UK

Aug 2017 — Present

*Software Developer (Remote)*

- Develop web applications and deliver solutions to newly desired features through a charity in the non-profit sector.
- Participate and collaborate with teams over Slack to approach agile software development with adaptive planning, evolutionary development and delivery, time-boxed iterative method, while also responding to rapid change.
- Sustain progress of goals through project management by taking on individual full-stack issues using GitHub.

**Ironhack Coding Bootcamp**, Miami, FL

Aug 2016 — Oct 2016

*Junior Web Developer (Student)*

- Built various projects individually through Sublime Text and in paired-programming including Spotify Player, Pizza Creator, PokeDex, and HomePerc as an individual final project.
- Learned essential web practicing skills such as focusing on clean code (DRY) principles, design patterns, test-driven development, and demonstrated proficiencies of these topics by assembling projects.

**Jimmy John's Gourmet Sandwiches**, Bloomington, IN

Aug 2009 — Aug 2016

*Delivery Driver / In-Shopper*

- Exhibited leadership by discussing mistakes, progress, and providing advice to other employees.
- Marketed and promoted sandwich samples to potential customers at events such as Indiana University athletics.
- Contributed vigorous teamwork while working the bread line in a fast-paced restaurant environment.

**Arkansas Department of Human Services**, Searcy, AR

Jan 2014 — May 2014

*Family Service Worker (Intern)*

- Cultivated strong interpersonal and active listening skills by engaging in intense conversations with clients
  - Increased emotional intelligence, self-awareness, and empathy by being exposed to high levels of stress
  - Expressed essential transparency, honesty, and sensitivity when communicating and reporting to supervisor
- 

## PROJECTS

**TimeTracker** — <https://matt-overtime.herokuapp.com/>

Jun 2017

- Operated as a full-stack developer to create a payroll system to track employee's total hours plus overtime through a weekly audit log by testing and validating model instances utilizing the RSpec Ruby Gem.
- Implemented modules to send SMS notifications through the Twilio API to employees asking them to log if they had overtime or not. Sent email notifications to managers to inform them of pending overtime requests.
